DETAILED ACTION

Claim Rejections - 35 USC § 103

Claims 1, 3, 5-7, 9, 11-13, 15, and 17-18 are rejected under 35 U.S.C. 103(a) as being unpatentable over Shavit et al. in view of Duffy et al.

Shavit et al. disclose, or inherently teach, all of the limitations of the claims including: supply chain management using a network; receiving data from a plurality of outlets; generating an electronic order (See for example Col. 6, lines 19-51); transmitting data from product outlets to distributors and suppliers (See for example Col. 6, lines 9-13); forecasting activity in the supply chain using the data (See for example Col. 7, line 19); registering the users (see for example, Col. 6, lines 9-13), security and limited access (see for example, Col. 9, lines 43-56), use of identity and password data (see for example, Col. 10, lines 1-15), maintaining a registered users list (see for example, Col. 11, lines 22-35)

Shavit et al. lack the specific teaching of receiving data relating to completed sale amounts of home products of a home product franchise whereby the sales are not generated by sales via the network; and generating an electronic order form based on the data.

Duffy et al. teach a similar supply chain management system whereby data relating to sale amounts not generated by sales via the network are received (See for example, Duffy et al. paragraph 0056); and generating an electronic order based on accounting and inventory information (See for example Duffy et al., paragraph 0046).

It would have been obvious to one of ordinary skill in the art at the time of the invention modify Shavit et al. to include the receipt of data relating to completed sales amounts whereby the sales are not generated by sales via the network, and to generate electronic orders based on the sales information, in view of Duffy et al., in order to “save significant time and cost for buyers attempting to obtain items and suppliers attempting to provide items” (See Duffy et al., paragraph 0028).

It would have been an obvious design choice at the time of the invention to one of ordinary skill in the art to have the products include “home products” from a home product franchise, in order to provide a system that can “cut inventory costs at each level of the distribution chain and permit new and previously impossible or impractical transactions and business arrangements” (Shavit, Col. 2, lines 1-5), and thus be able to pass on the lower costs to end users for home use.

Response to Arguments

Applicant's arguments filed 4/29/04 have been fully considered but they are not persuasive. The applicant argues on page 10 of his response that Shavit et al. does not disclose or suggest the receipt of “POS data”. However, the pending claims do not recite receiving Point-of-Sale data at all. The claims only recite “receiving data... the data **relating** to the completed sale amounts of home products”. There is no specific mention of POS data, thus, the applicant's argument with respect thereto is moot.

Further, the applicant argues that Shavit et al. does not disclose the concept of an independent supply chain manager performing the operations listed in the claims. However, again the claims do not specifically state that the manager performs the

operations of the claims. It is the computer that appears to perform the operations and Shavit et al. in view of Duffy et al. teach all of the limitations described.

Conclusion

THIS ACTION IS MADE FINAL. Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire **THREE MONTHS** from the mailing date of this action. In the event a first reply is filed within **TWO MONTHS** of the mailing date of this final action and the advisory action is not mailed until after the end of the **THREE-MONTH** shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than **SIX MONTHS** from the mailing date of this final action.
